

NEW

NEW! Introducing Rheon's Two-Rowed, High Speed Dividing and Encrusting Machines for Savory Products.

Rheon Mega-Former

●Rheon's newly developed equipment consistently divides and encrusts various savory products at a high production capacity. ●Both models produce a maximum of 24,000 pieces per hour. This compact, yet high performance equipment can run in a very limited space. ●The body of the Machine, the frame and places where food comes into contact is all made of Stainless Steel for easy cleaning using high-pressured water.

Dividing Model

High speed dividing in two rows. Filled products can be made with additional option.

Encrusting Model

High speed Encrusting of various filled savory products in two rows.

Surimi Ball with Mixed Vegetable

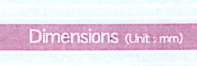

Baked Meatball

Filled Product (with Optional Feeder)
